EDUCATION

Miami University – Oxford, OH

Aug. 2017 – May. 2021

Bachelor of Science in Computer Science, Bachelor of Arts in Interactive Media Studies

Minor in Music Composition, Minor in Music Performance (Saxophone)

Honors: Graduated summa cum laude (GPA: 4.0), University Honors w/ Distinction, Computer Science Departmental Honors, President's List (8 semesters), Outstanding Senior in Emerging Technology, Overall Excellence in ETBD Awards, Lockheed Martin Leadership Institute Certificate

PROFESSIONAL WORK EXPERIENCE

ClickTime – San Francisco, CA (remote)

Software Engineer

Oct. 2023 – Present

Associate Software Engineer

Jun. 2021 – Oct. 2022, Jul. 2023 – Oct. 2023

Software Development Intern, Part-Time Student Contractor

Jun. 2020 – Feb. 2021

- Perform full-stack development across ClickTime's web application, REST APIs, and internal tools
- Collaborate with engineers and product managers on an agile team to deliver features, refactors, and bug fixes
- Contribute to long-term codebase health through maintenance, testing, and performance improvements
- Support team culture and growth through weekly team activities and the internship program

XR Studios – Los Angeles, CA

Creative Technologist

Oct. 2022 – Jun. 2023

- Operated and maintained a large-scale LED stage for mixed-reality film production
- Developed proprietary software and managed Perforce-based content delivery pipelines
- Optimized Unreal Engine and Unity scenes for real-time, stage-ready performance

Department of Emerging Technology in Business + Design – Oxford, OH

Research Assistant and Virtual Reality Developer

Jan. 2020 – Apr. 2021

- Researched and developed VR/AR simulations under Dr. Eric Hodgson using OculusVR, AR Foundation, and Vuforia
- Programmed interactive experiences and maintained VR/AR hardware in the Smale Interactive Visualization Center (SIVC)
- Worked extensively with the CAVE, a four-wall immersive virtual reality environment

London Computer Systems – Cincinnati, OH

Software Development Intern
2019

May 2019 – Aug.

Quality Assurance Intern

May 2018 – Aug. 2018

- Developed REST API endpoints, fixed bugs, and authored NUnit unit tests for Rent Manager 12
- Gained experience in agile back-end development and cross-functional collaboration
- Identified, documented, and tracked defects and inconsistencies in a large-scale standalone application

RESEARCH AND PROJECTS

Denver Night Lights Installation

Jan. 2025 – Apr. 2026

- Collaborate with artists and designers to produce a large-scale motion graphics installation for the Daniels & Fisher Tower
- Compose an original musical work synchronized with the installation, premiering April 2026

FuTerra | I Was The Earth (BLINK 2024 Projection Installation)

Jan. 2024 – Oct. 2024

- Served as Music Director and Technical Artist for a large-scale immersive projection installation presented at BLINK 2024
- Collaborated within a multidisciplinary team to realize a future-facing narrative exploring community, urbanity, nature, humanity, and technology
- Designed and implemented a generative music system capable of continuous, non-repeating playback synchronized with the installation environment

- Contributed to projection mapping workflows, media server programming, and Unreal Engine scene development to support real-time visual performance.

Malone University – Parkinson's VR Training

Jan. 2020 – Apr. 2021

- Developed a VR training simulation for a nursing research study under Dr. Eric Hodgson
- Implemented C# systems in Unity including interaction logic, UI, haptics, audio, and animation
- Collaborated with a 3D modeler/ animator to enhance realism and engagement

Gathering at the Poet's Shack (ETBD Capstone)

Aug. 2020 – Dec. 2020

- Collaborated with ETBD students to create an immersive, interactive arts installation at Miami University
- Developed a web application and REST API using Node.js, Express, and AWS for user-submitted poetry
- Created projection-mapped visuals using TouchDesigner with Kinect Azure and Python integrations

SKILLS

- **Programming Languages:** C#, C/C++, JavaScript/TypeScript, Python, Java
- **Frameworks and Technologies:** .NET Framework, Angular, React, (MySQL/PostgreSQL/Microsoft SQL Server), git, Perforce, NodeJS, ExpressJS, OpenGL, GLSL, Vulkan, Unity Engine, Unreal Engine, OculusVR, OpenVR, AR Foundation, Vuforia, Three.js/R3F
- **Software Development:** MVC web development, MVVM mobile application development, REST API development, virtual/augmented reality development
- **Design:** UI/UX design, graphic design (Adobe Photoshop/Illustrator/InDesign), motion and video design (Adobe AfterEffects/Premiere, Notch, TouchDesigner), audio and music design (FL Studio, Finale, Audacity, and Ableton Live)
- **Saxophone:** Performance on soprano, alto, tenor, and baritone saxophones, including pieces by Noda, Villa-Lobos, Creston, Ibert, Heiden, and Lunde
